

Victorian Government Rebate Statement

Cola Solar have never received a WorkSafe infringement notice from WorkSafe Victoria since the company was founded in 2010. We continue to abide by WorkSafe regulations to keep our employees and customers as safe as possible. We recognise the dangers of installing rooftop solar which is why we take every precaution necessary to ensure a safe installation by using the required equipment, providing safety training, and conducting the required daily site-specific work method statements.

To be eligible for the Victorian Government Solar Homes Rebate, one criterion is that you must engage an installer who has not received a WorkSafe infringement notice in the past three years. Victorian households who choose Cola Solar as their installer are guaranteed this Company Statement satisfies that WorkSafe criteria for the Government rebate.
