

solar  analytics

Get more from your solar

Our smart solar software delivers you more value from your solar system. Everything you need in a simple view to give you more confidence in your system, more savings and more insights.

Everything you need

True Performance monitoring

See if your solar is performing as it should, and if it's not, we'll let you know.

Plan Optimiser

Take the guesswork out of saving on energy bills.

Savings Analysis

Watch your savings grow with the most accurate savings calculations.

Battery Calculator

Choose the right time and the right battery for you.

Energy Insights

Full visibility over your energy usage and when to best use your solar.

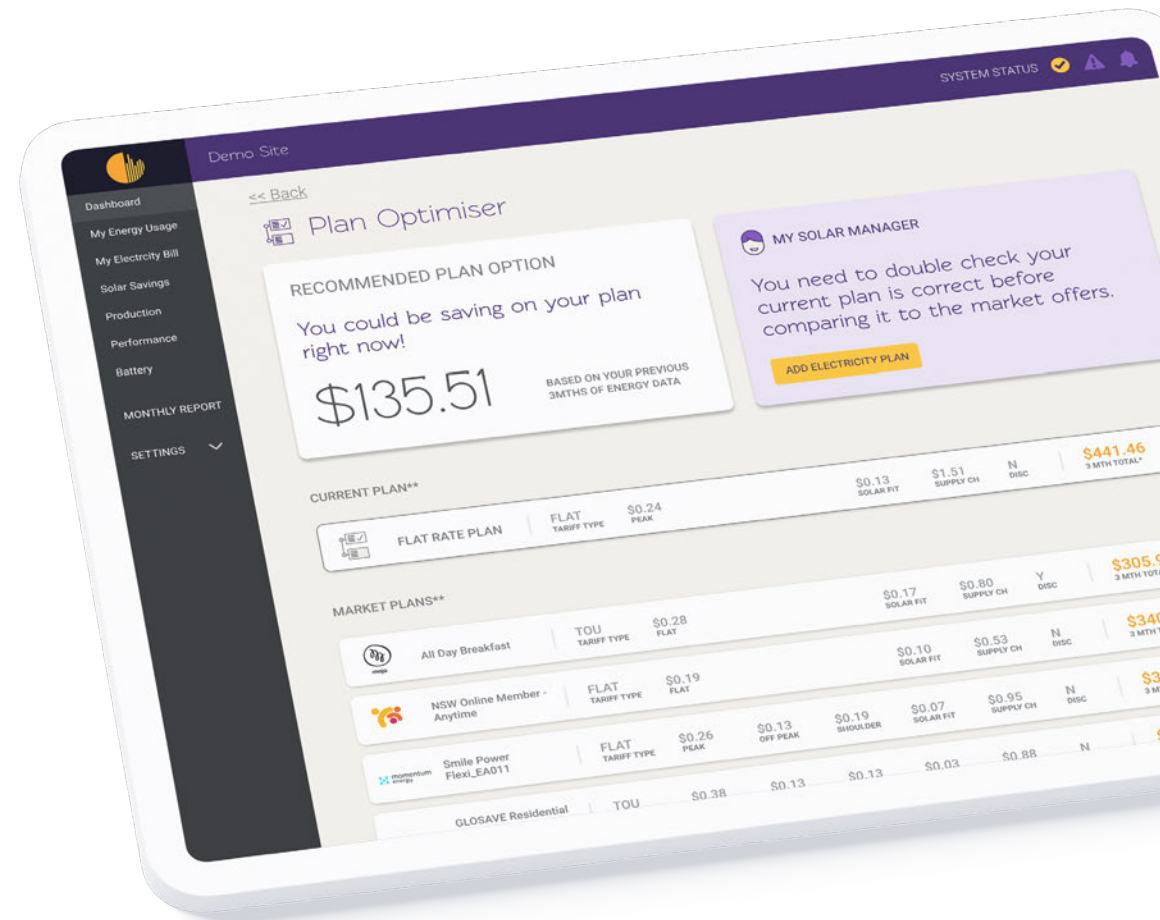

Plan Optimiser

Uses your actual household solar and energy data to compare the best available energy plans currently on the market and highlights the best plan for you.

Automatically updates new plans on offer and regularly recalculates your potential savings.

This allows you to know you're always on the best energy plan.

No assumptions, just clear comparisons.

True Performance

Our patented algorithms calculate exactly how much energy you should be producing every day of the year.

We constantly monitor and analyse to let you and your retailer know when your solar system isn't performing at its peak.

Improved performance, faster fault rectification and more uptime means greater solar savings and faster payback.

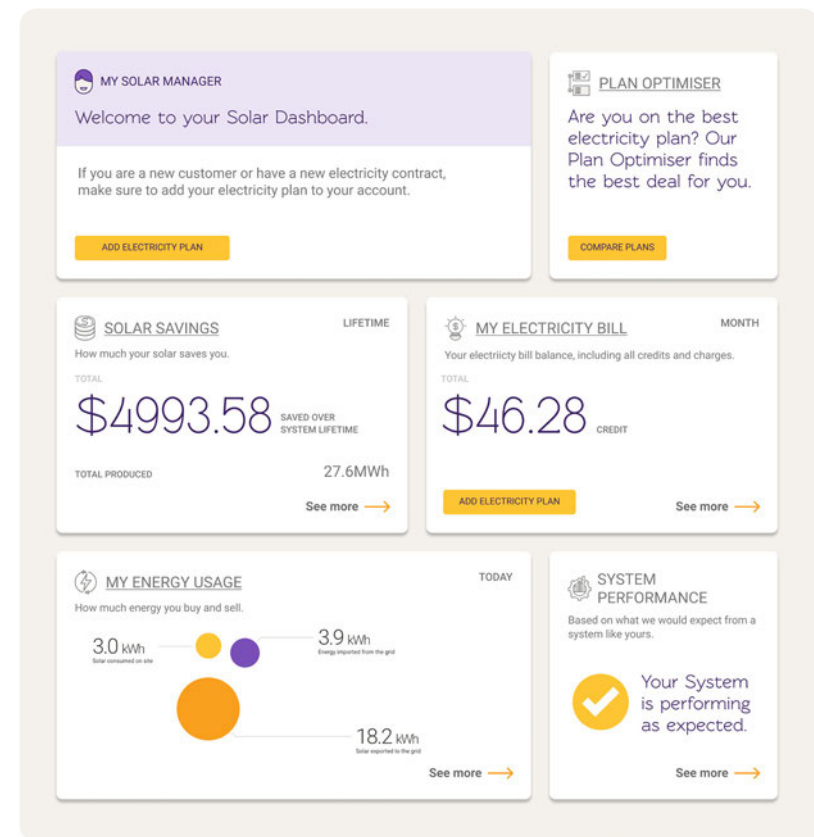

Savings Insights

We translate all your kWh into dollars so you can see exactly how much savings your system is delivering right from day one.

Easily track the payback of your investment from your solar savings.

See how the various costs and credits of your plan add up to help you anticipate your electricity bill.

Know when it is the right time for you to make the investment in a battery.

How it works

1. Data from anywhere

Your solar and energy data can be collected directly from the inverter or via the Solar Smart Monitor

2. All the data you need

The exact characteristics of your system and your home's energy pattern create your unique energy profile ready for analysis

3. Smart Algorithms

Through our patented algorithms, we turn your data into information you understand and clear insights to ensure you maximise your savings

How to get it

Solar Analytics works with solar retailers to deliver you the most comprehensive experience with your solar. From installation and commissioning, to ongoing service and maintenance, to celebrating savings and payback, Solar Analytics and your solar retailer together ensure that you Get More from Your Solar.

Solar Analytics' products and services are available through any solar retailer.

Talk to your solar retailer about getting Solar Analytics today.

“Less than a month in, Solar Analytics has already saved us money.”

Jason T, Blaxand NSW

Solar Analytics is a multi award-winning Australian software company helping more than 25,000 solar system owners to get more from their rooftop solar.

Solar Analytics is proud to be a Certified B Corporation.
